

Wrangle & Profile

Create a report to reflect on your learnings during the Wrangle & Profile stage.

You can decide whether you would like to write the report in German or in English.

In the report, please address the following topics:

1. Describe what you did in the *Wrangle* stage.

Expected length of this part: ½ to 1 A4 page, more if c) is also addressed.

a. How did you join the datasets?

Which keys did you use to join the data? Did all keys match? Did you have to introduce new keys?

b. Which data cleaning steps have been necessary?

Did you experience data issues, and if so, which ones? How did you solve them? Did you use automated methods? Did you use visualization to inspect data issues?

c. **OPTIONAL:** Visually show and explain the quality of your dataset.

Come up with your own, creative, visual representation of the data quality of your dataset (e.g., as a general overview, to identify underrepresented aspects in your data, before and after joining, before and after cleaning, etc.).

2. Describe your insights during the *Profile* stage.

Expected length of this part: ¾ to 1 A4 page per insight.

a. Insight 1 (Text + Visualization)

Short text describing the insights plus one visualization.

b. Insight 2 (Text + Visualization)

Short text describing the insights plus one visualization.

c. Insight 3 (Text + Visualization)

Short text describing the insights plus one visualization.
